**The 7th Serbian Congress of Pharmacy with International Participation
“Creating the future of pharmacy together”**

October 10 - 14, 2018

Belgrade, Serbia

The Serbian Congress of Pharmacy, traditionally, provides an opportunity for gathering pharmacists and other professionals working in the area of pharmaceutical science and practice.

The Congress program will include more than twenty sessions covering different topics of interest. It will encompass presentations of the eminent plenary and guest speakers, as well as a number of oral and poster presentations, with the aim to present the latest research in pharmaceutical sciences and contribute to continuous improvement of professional pharmacy practice, health and overall patients' well-being. The Congress will also provide an opportunity for networking with colleagues and business partners, exchange of ideas and experiences and development of future collaborations.

Congress sessions highlight:

- *In vitro* investigation and *in silico* modelling of biopharmaceutical properties of biologically active compounds
- Drug discovery and development from natural products
- From research to novel strategies in therapy of autoimmune diseases
- Novel drugs for psychiatric and neurological disorders: hurdles and hopes
- Contemporary approaches in drug analysis and quality control
- Anticancer drugs in the era of precision medicine
- Benefits and risks of food supplements
- Pharmaceutical care: from evidence to health care service
- Pharmacy workforce development in the 21st century

18th World Pharma Congress
“Challenges and Opportunities in Transforming the Pharma Industry”
October 18 - 20, 2018
Warsaw, Poland

The 18th World Pharma Congress invites all the participants across the globe to Warsaw, Poland, in October 18 - 19, 2018, which includes prompt keynote presentations, oral talks, poster presentations and exhibitions. The gathering will address pharmaceutical research in the area of pharmaceutical manufacturing while laying emphasis on innovative methodologies in pharmaceutical and food manufacturing.

With participants from around the world focused on debating about pharmaceutical sciences and its advances, this is the best opportunity to reach the largest assemblage of participants from the pharmaceutical sciences community. World-renowned speakers, the most recent techniques and developments, and the newest updates in pharmacy are hallmarks of the 18th World Pharma Congress. This is an excellent opportunity for researchers, scientists, PhD students in the pharmaceutical field, research entrepreneurs and delegates from universities and institutes to interact with high professional personalities. It is a platform to discuss various aspects of cutting edge strategies, new technologies, developments and methods to allow further research, diseases and therapeutic strategies, case studies from all over the world and research experiences of eminent investigators along with latest technology/solution advancements in the field.

The main theme of the conference is “Challenges and Opportunities in Transforming the Pharma Industry”.
