**The 27th EAHP Annual Congress
22nd - 24th of March 2023, Lisbon, Portugal**

“From drug design to treatment success – what really matters to patients?” will be the theme for the presentations at the 2023 EAHP (The European Association of Hospital Pharmacists) Congress.

The topics will critically assess the whole pharmaceutical process from the patients’ perspective and pinpoint what really matters to them and how hospital pharmacists can make this happen.

The 27th EAHP Congress will offer inspiration to fulfil the patients’ needs with respect for continuity and quality of pharmaceutical therapy and patient safety.

It will not be a surprise that communication, interaction and personalised approach are the themes for the three keynote lectures.

Over 20 seminars and workshops will be presented, with topics related to research activities, e-hospital pharmacy, drug shortages, procurement, quality compounding, pharmacogenomics, renal transplant, medication safety and efforts for a green hospital.

Also, a seminar dedicated to a current topic in pharmacotherapy will be added.

Along with keynotes and seminars, best practices will be disseminated by our poster prize nominees and through the Good Practice Initiatives.

In addition, workshops within the theme of the congress will be given and the Synergy programme is extended with relevant topics.

19th World Congress of Basic & Clinical Pharmacology
2nd – 7th July 2023, Glasgow, Scotland

The British Pharmacological Society will be hosting 19th World Congress of Basic and Clinical Pharmacology (WCP2023).

Held from 2nd – 7th July in Glasgow, Scotland, WCP 2023 will bring together scientists from across the world.

From 2nd – 7th July 2023 the world's pharmacology and therapeutics community we will welcomed to the Scottish Events Campus in Glasgow, Scotland.

There will be celebrated the diversity of this community, from students and early career pharmacologists to the world's leading authorities; from clinical pharmacologists working in national healthcare systems to innovators at the cutting edge of drug discovery in industry and academia.
