**ESCP Kraków symposium 2024: Implementing and scaling sustainable
clinical pharmacy practice
20-23 October 2024, Krakow, Poland**

We are proud to invite you to join the Autumn Symposium of the European Society of Clinical Pharmacy in Krakow, Poland from 21– 23 October 2024. This Autumn Symposium will focus on Implementing and scaling of sustainable Clinical Pharmacy.

- As an international leader in advancing clinical pharmacy practice the ESCP recognises that clinical pharmacy is a hugely influential force across the spectrum of the patient pathway to improve medicines use and patient outcomes. The Autumn Symposium in Krakow will focus on implementing, scaling and spreading and achieving the sustainability of innovations in clinical practice, all supported by new models of education and lifelong learning. This will be consistent with evidence generated both through robust, rigorous research and service evaluation relevant to all key stakeholders.
- On these pages you will find all relevant information about the event, the venue, hotels etcetera.
- Information will be added and updated regularly.
- Please note that ESCP membership gives a discount on the registration fee.

**29TH EAHP Congress in Copenhagen, Denmark
12-14 March 2025
Person centered pharmacy – navigating digital health**

Hospital pharmacists around Europe will again have the opportunity to share their expertise and latest developments in practice to advance patient outcomes through learning and nurturing partnerships and networks.

The congress will bring us all closer to change, progress and evaluation of what we deliver today to patients seeking pharmaceutical care across European hospitals and healthcare systems in complex digital infrastructures. Moreover, as the congress takes place in times of a generational reform of pharmaceutical legislation, it will mark the beginning of different approaches towards digital environment where patient-centred and seamless care interlinks, while securing safe healthcare delivery and optimizing health outcomes.

Healthcare professionals are not only obliged to change and evolve the practice, but to monitor the current and future hospital pharmacy policy and legislation landscape which gives the opportunity to drive change thereby allowing to continue the numerous activities dedicated and focused on patients. Having said that, EAHP is fully aware of challenges that the healthcare providers are facing in times of poly-crisis, shortages of medicines and medical devices and finally workforce shortages. Although in every one of EAHP's 36 member and 4 associate member countries, hospital pharmacists experience different obstacles while following the patients throughout the healthcare system, the EAHP congress shows, that hospital pharmacists stay united and will continue to improve pharmaceutical care towards the ultimate goal of providing the best possible treatment for patients, based on efficient and high-quality services and by leveraging previously gained decades of experience.
